

## Special Seatbelt Airbag Offer for Comanche Aircraft

Eighty-percent of new single engine general aviation aircraft come equipped with AmSafe seatbelt airbags as standard equipment. Now for the first time this life-saving technology is being offered to Piper Comanche Owners.

AmSafe® has designed a program that can make airbags a reality for all models of Comanche aircraft. However, to move forward with this plan we will need a commitment from a minimum of 20 owners to purchase seatbelt airbags. Once we have reached this target we will formally launch the development and STC process. Act now as this offer ends November 1, 2010 and is only available for U.S. registered aircraft. Ten-percent of the special purchase price is required to secure your seatbelt airbag system.

- All kits include the hardware necessary to install the seatbelt airbag in the pilot and co-pilot seat positions. Kits are designed to replace your existing restraint system. As an example, you would purchase a 2-point seatbelt airbag system to replace your existing 2-point restraint; a 3-point seatbelt airbag to replace your 3-point restraint. You cannot order a 3-point airbag kit to replace your existing 2-point restraint.
- Kits must be installed at any authorized AmSafe Service Center. A complete list of service center locations can be found on [www.GaAirbags.com](http://www.GaAirbags.com).
- A 10% deposit is required with each order. Your deposit is fully refundable if AmSafe does not receive the required number of orders to launch the development program or fails to certify the system.
- The balance owed will be charged against your credit card at time of shipment. **Additional rebates or other discounts cannot be applied to this special program offer.**
- Timeline for completion of development and certification is expected to take seven months. **Estimated start date is November 1, 2010 with certification by June 1, 2011.**
- The balance owed on the kits will be charged against your credit card upon shipment of the product. Once an order is placed it cannot be cancelled unless AmSafe fails to obtain the 20 order commitment or is unable to complete the certification for whatever reason.
- Program updates will be provided via the ICS web site or by email to each of the launch customers on a regular basis.
- All orders must be delivered within six months after complete certification by AmSafe.
- Additional terms and conditions apply.
- If you still have questions about airbags or the program please call **1 (877) 684-6447** or email: [sales-gaairbags@amsafe.com](mailto:sales-gaairbags@amsafe.com)
